

# Sirvan Doukchi

## SOFTWARE ENGINEER

### Career Summary

Full-stack developer, with hands-on IT experience, passionate and self-motivated to actualise ideas all the way to implementing in browsers in a user-friendly and modern interface. I am committed to continually advancing my knowledge of relevant technologies including JavaScript, React JS/Native, TypeScript, Redux, Ruby on Rails, Node.JS and more.

I am also a footballer and very fond of my meticulously picked podcast shows!

### Contact

- Sydney, NSW
- 0406 471 171

### Skills

#### Languages

- JavaScript/TypeScript
- Node.js
- Ruby
- CSS/SCSS

#### Database/Cloud

- PostgreSQL
- MongoDB
- Firebase
- Azure

#### Frameworks/Libraries

- React.js
- Redux
- NextJS
- Tailwind CSS
- Styled Components
- Bootstrap 5
- Material UI
- Jest/React Testing Library

#### Techs/Certifications

- Jira Workflow
- Github Actions
- Adobe Photoshop
- MS Azure (AZ104)
- CISCO CCNA

## Software Engineering Projects

### MyTaxi

Uber-inspired mobile application, where based on origin and destination information provided by the user, will show markers and the path from origin to target

**Tech Stack:** React Native – Redux – Tailwind CSS

### Princes Theatre

Front-End App where Star Wars fans can find an affordable option in between two streaming providers. Using an inconsistent API to retrieve information and recall to receive a response. Components tested using Jest and API call mocked for integration test.

**Tech Stack:** JavaScript – React – SASS – JEST (React Testing Library)

### Portfolio

Professional portfolio designed with a mobile view first in mind and a minimalist look. UX and colour contrast principles are followed.

**Tech Stack:** React – NextJS – SASS – CSS3

### BookShelf

A community library Full-Stack application where users can signup/log in using own account or Gmail and donate/borrow books.

**Tech Stack:** React – NodeJS / Express – MongoDB for Database – Firebase Authentication – Material UI – Google Books API and REST API

### Servo App

Upon loading, given the location permission from user, this Full-Stack app marks the location of user, along with all petrol stations across Australia. Some other fun and useful facts have been also implemented.

**Tech Stack:** JavaScript – Node JS / Express – Google Maps API – Government provided DB – PostgreSQL – Bootstrap 5

### Space Watch

Twitter-inspired Back-End app where users can register/login to share extraterrestrial images! Users can do CRUD actions, like images and view the most liked ones.

**Tech Stack:** Ruby/ Sinatra – Node JS – User Authentication – OMDBI API – CRUD actions – Deployed to Heroku

## Work Experience

Clayton UTZ Law Firm

Dec 2020– Sep 2021

### IT Support Analyst

Active directory administration, Microsoft Azure user groups, forest and domain management, shared drives, and application of SCCM, RDP, Logmein, and Skype remote consoles for assisting remote clients.

Melbourne Institute of Technology

Oct 2019 – Dec 2020

### IT Support Officer

Liaise with internal staff and students over the phone and on-site utilising HEAT ticket management for level 1 and 2 services and escalation of level 3 and security concerns to infrastructure teams.

## Career Summary

Full-stack developer, with hands-on IT experience, passionate and self-motivated to actualise ideas all the way to implementing in browsers in a user-friendly and modern interface. I am committed to continually advancing my knowledge of relevant technologies including JavaScript, React JS/Native, TypeScript, Redux, Ruby on Rails, Node.JS and more.

I am also a footballer and very fond of my meticulously picked podcast shows!
